

Storage

The 280L slide out drawer is accessible through the tailgate when the camper is closed

The under bed storage is accessible by either sliding out the drawer or lifting up the gas strut assisted bed base. There is more storage in the side bins which can also be reached when the bed is down

Aluminium mesh on roof rack for extra storage

100L pantry with cutlery tray and sliding bench

Under sink storage and grill

Aussie Swag campers have ample storage. The *Rover LX*, *Explorer* and *Ultra* all have a huge, slide out, under bed storage drawer which can also be accessed through the rear tailgate when the camper is closed. There is plenty of space in the side bins beside the bed, and there is also enough room on top of the bed to carry a fold up table and two chairs with the bed made up. The area above the battery bin is also useful for storing items that need to be accessed through the tailgate.

In the kitchen there is a large, slide out, 100L pantry and an under sink storage area to keep all your food and kitchen items. A checker plated roof rack on top of the kitchen unit stores extra gear and does not need to be unloaded to open the trailer or access the kitchen. There is also a large steel box in front of the kitchen which is divided into two vented compartments. In the *Ultra* and *Explorer* models one of these compartments is used to house an 80L *Waeco* fridge/freezer (which slides out beside the pantry), while the other can hold a generator and a hot water system (standard on the *Ultra*), ropes, pegs, etc. In the *Rover LX* these boxes are used for storage.

The *Ultra* has mesh in the roof rack for carrying items that are large or cumbersome.

There is ample storage on the kitchen box rack - the Aussie Swag Storage Bag is also available ▼

At Aussie Swag Campers, we appreciate the need for absolute comfort when travelling. The large comfy bed measuring 1950mm x 1415mm x 110mm (6'5" x 4'8") is made from a high density foam with a layer of premium quality, convoluted egg shell on top. Our beds have a space at the sides, allowing easier bed making and providing access to the useful storage bins along the sides. The trailer body is 5'7" wide inside, so you have stacks of elbow room.
